

## **Introduction to the Allied Health: Credentialling, Competency and Capability (CCC) Framework**

This workshop will explore broadly the concepts of credentialling and defining scope of practice, competency and capability and give general advice on how the [Victorian Department of Health and Human Services, Allied Health CCC framework](#) can be used to supplement existing processes within your organisation. There will be opportunity in this session to use some of the key resources and no prior knowledge of the framework is required.

### **Background:**

Allied health practitioners, deliver services across a diverse range of sectors, contexts and settings with considerable variation in the approach and scale of the governance processes underpinning them. By developing and implementing a consistent approach to allied health credentialling, competency and capability, the workforce and health service management, will be better equipped to respond dynamically to the changing and increasing healthcare demands, challenges and opportunities in the future.

This workshop will be presented by the development and implementation leads from each of the three framework sections: Jill Walsh, Annie Pearce and Sam Sevenhuysen.
